

HR Analysis Dashboard

Introduction:

This Power BI project is a 3-Page HR Analytics Dashboard designed to track overall organizational health, support operational decision-making, and surface root causes of employee turnover.

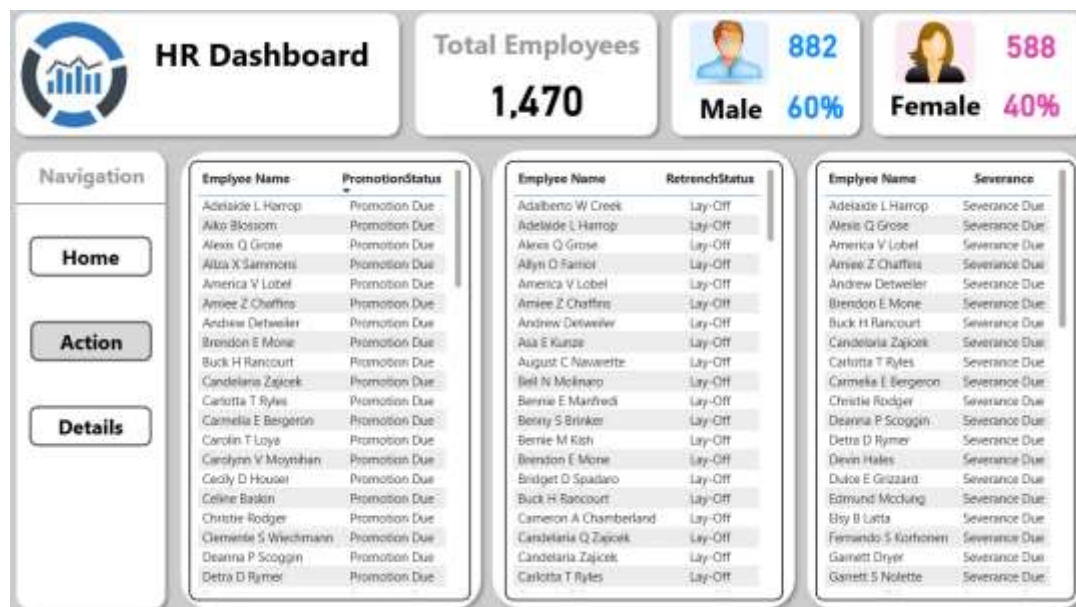

Home Page:

- Tracks high-level headcount dynamics (1,470 total staff; 60% male, 40% female).
- Highlights core workforce KPIs including an active service rate of 92%, a 16.1% attrition rate (237 employees), an 8.0% retrenchment rate (117 employees), and a 4.9% promotion rate (72 employees).

Action Page:

- Provides actionable, row-level tracking tables for HR specialists to execute operational moves.
- It flags specific employees due for **Promotions**, those targeted for **Lay-Offs/Retrenchment**, and individuals eligible for **Severance** payouts.

Details Page:

- Focuses on operational drivers and payroll impact.
- It contrasts promotions versus retrenchments by department (R&D facing the highest retrenchment at 74 staff), tracks employee satisfaction levels alongside overtime participation (28.3% working overtime), and monitors payroll costs (\$9,559K total monthly expenditure; \$6,503 average per employee).
